

High speed color changes with WAGNER Cobra®

SMALL VOLUME APPLICATION WITH WAGNER COBRA®

Fast color changes - less solvent consumption

QUICK COLOR CHANGE

WAGNER Cobra® allows the usage of different hoppers like the 0.7L XS hopper, the 5L version or the flexible suction hose as well as other cup systems. Within seconds you can change the color and flush the pump with a minimum amount of solvent before spraying again!

SIZE MATTERS!

WAGNER Cobra® is 6-times smaller than a standard piston pump and 10-times smaller than a bellows pump - and offers at least the same power.

EASY TO CLEAN

A drastic reduction in solvent consumption during flushing operations thanks to its smaller displacement volume and easy-to-clean design.

REDUCE WASTE SIGNIFICANTLY

The innovative and exclusive technology of the WAGNER Cobra® high pressure diaphragm pump enables users to save up to 60% of time, paint and solvent on each color change and cleaning operation.
